

Development Report

Date: 12 May 2026

Prepared by: Islem

Work Completed

1. AGS Mobile — Formations (Enrollment)

- Implemented enrollment flow for online and presential formations
 - Updated UI to surface free-access formations
 - Mobile implementation complete — awaiting backend `.env` from Khalil (promised 21:00) to wire and validate end-to-end
-

2. AGS Web — Formations (Enrollment)

- Implemented enrollment functionality for online and presential formations with user authentication
 - Mirrors the mobile flow; pending same `.env` to go live
-

3. AGS Mobile — Carte / Map

- Added line drawing on the map
 - Added point markers on the map
 - Added DEV LOGIN button on profile screen for faster testing
-

4. AGS Mobile — Authentification

- Refactored signup form — improved layout and error handling
 - `mapStore.clearLocalData()` now invoked on signout to reset local state and prevent leakage between sessions
-

5. AGS Mobile — Navigation

- Introduced reusable `BackButton` component
 - Replaced ad-hoc back navigation across 13 screens (jobs, orders, incidents, itineraire, training, shop, auth)
-

6. AGS Mobile — PDF / Itinéraire

- Refactored logo asset handling in `pdf-assets.ts` to use base64 embedding
 - Removed dependency on `expo-file-system` and `Image.resolveAssetSource` for logo retrieval
 - Ensures reliable logo rendering in production builds
-

Blockers

- **Khalil .env** — required to finalize formations enrollment (mobile + web). ETA 21:00 today.
-
